

Surface Milling _ CNC Router & RhinoCAM _ Parallel Rough & Finish

see more at: <http://alphonsofeluso.tumblr.com/post/78576566804/human-skin-under-a-microscope-represented-in-cnc>

Process: CNC Router (subtractive fabrication)

Project: (1) 12" x 8" x 3/4" CNC Milled MDF

Design a surface and then Mill it on the CNC Router

Learning objectives: RhinoCAM basics: *Parallel Rough & Finish*

Deliverables: Screen shot of RhinoCam Simulation
Photos of CNC milling process and finished milled surface
All photos should be professional photoshopped photos with good lighting

Schedule: Due before Class-05

Submit: Bring your milled surface to class with you
Submit all deliverables to the shared Google Drive
